

About Me

Computer Engineering graduate with hands-on experience in full-stack software development through academic, internship, and real-world projects. Experienced in building applications with Java, Spring Boot, React, PostgreSQL, and Docker. Eager to contribute to collaborative teams and develop reliable software solutions that address real-world challenges.

Education

Ondokuz Mayıs UniversitySamsun, Turkey
B.S. in Computer Engineering, GPA 3.082021 – 2025
Capstone Project: Smart Attendance System

Experience

STMAnkara, Turkey
Cyber Security Intelligence InternAugust 2023 – September 2023

- Conducted research on cyber security threats, attack vectors, and emerging vulnerabilities.
- Performed vulnerability analysis and threat intelligence investigations.
- Worked with security-focused research methodologies and reporting processes.

STMAnkara, Turkey
Command Control Systems InternAugust 2024 – September 2024

- Contributed to the transformation of a military-grade software system into an autonomous solution within an international defense project.
- Developed and maintained Java-based modules utilizing JSON data structures.
- Performed API integration and testing using Postman and Insomnia.
- Worked with WSO2 Identity Server and REST APIs for user and group management operations.

Projects

Clinic Automation and Appointment Management System
Developed a full-stack clinic management platform for appointment scheduling, patient management, and clinical workflow tracking.
Technologies: React, Vite, Spring Boot, PostgreSQL, Docker, JWT, Flyway

GeoEstate Analyzer
Developed a geospatial analysis platform using PostGIS to identify nearby facilities and risk zones through spatial queries and interactive maps.
Technologies: Java, Spring Boot, PostgreSQL, PostGIS, React, Leaflet, Docker

Smart Attendance System
Developed a mobile attendance application utilizing QR code and face recognition technologies for automated student attendance tracking.
Technologies: Flutter, Firebase Firestore, Python, Face Recognition

WSO2 Configuration Importer
Developed an automation tool for managing users and groups across multiple tenants using SCIM2 APIs and WSO2 Identity Server.
Technologies: Java, Spring Boot, WSO2 Identity Server, SCIM2, REST API

E-Commerce Website
Developed a web-based e-commerce application including authentication, product management, and shopping cart functionality.
Technologies: Java, JSP, Servlet, MySQL, HTML, CSS

All Projects Available on GitHub: github.com/akdenzahmet

Skills

Programming Languages: Java, JavaScript, TypeScript, Python, C++, Dart, SQL
Technologies: Spring Boot, React, Flutter, PostgreSQL, MySQL, PostGIS, Docker, REST API, JWT, Git, Maven, Postman, Insomnia
Languages: Turkish (Native), English (B2)
Exams: ALES (Quantitative): 89/100 (2025)
Certificates: TalentCoders - AI of The Future MiniCamp • TalentCoders - TechCamp 2025 • Atıl Samancıoğlu - Advanced Python • BTK - AI-Powered Image Processing Workshop
